## **Dynamatic Hydraulics Limited UK Business Policy**

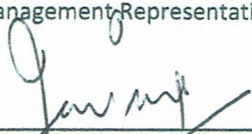

Dynamatic Hydraulics UK, a division of Dynamatic Limited UK is involved in ' Design, Development, manufacturing, assembly, testing and after sales support of Hydraulic Gear Pumps, Hydraulic Motors, Hydraulic Valves and integrated hydraulic packages for Farm Mechanisation (Tractors, Harvester Combines), Off Highway vehicle- OHV (Excavators, Backhoe Loaders, Dumpers, Dozers, Cranes ETC), Material Handling and Material Processing (Power Screens, Crushers, Forklifts), Transport, Machine tools and Mining equipment Sectors" taking care of related environmental and associated aspect during these processes.

1. It is our policy to provide world class creative and innovative solutions to delight our customers at cost effective prices on continuous basis.
2. Delivering superior value to our customers, we will build a successful business model for ourselves, capable of returning high yields to investors and improving the quality of life of all our employees.
3. We are committed to continual improvement, prevention of pollution and to comply with applicable legal and other requirements. We will meet and improve on applicable statutory and regulated requirements, continually.
4. All processes will be eco –friendly and be designed to eliminate wastage, spillage and to protect environment by optimum use of natural resources through Reducing, Recycling and Re-using waste.
5. It is our commitment to continually improve the effectiveness our integrated management system, enhance quality and environmental performance and satisfy interested parties and requirements through total employee involvement.
6. Quality objectives will be set to support this Policy, and the organisations changing context, these will be reviewed at the weekly Senior Managers Business Team meetings and the quarterly Management review meetings

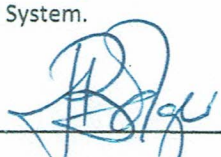

Dynamatic Hydraulics Ltd Quality System has a documented model for quality assurance. It is based on the ISO9001;2015 standard. It contains five levels of documentation to ensure that Dynamatic Hydraulics Ltd will have a Business Management System in place that will ultimately supply a conforming product to our customers' established designs. The five levels are:

- Business System Policy
- Business System Manual
- Business System Processes
- Work Instructions
- Records, Forms etc.

Together, these 5 levels describe how all associates and sections work together at Dynamatic Hydraulics Ltd UK. They cover specific actions, responsibilities and controls that are essential to ensure complete implementation of the Business Management System, this has led to the appointment of a Management Representative The Quality Manager who is responsible for assuring complete compliance to the published Business Management Systems documentation. The Management Representative has full authority to implement and maintain the System.
